Subject: **Request for Statement of Completion and As-Built Drawings**
Project Name: Barton Farms - Littoral Zone Modification
Permit No.: 44009834.005
Compliance No.: 379862
County: Sarasota

Dear Mr. Horton:

The Southwest Florida Water Management District (District) issued a permit for the subject project on April 09, 2010. A condition of the permit requires that upon completion of construction or prior to beneficial occupancy, a Statement of Completion form and as-built drawings of the completed surface water management system are to be submitted to the District. On June 11, 2015, District staff determined that construction of the system is complete.

In order to bring this matter into compliance, a fully executed grandfathered form Statement of Completion and Request for Transfer to Operation Entity and as-built drawings must be submitted to the District no later than **October 22, 2015**. The response should be directed to me at the Sarasota Service Office. A copy of this form can be located on the District's ePermitting Website at <http://www.swfwmd.state.fl.us/permits/erp>. The form details the information that should be verified and submitted by the certifying professional in support of the Statement of Completion. Please note that the as-built drawings must include information pertaining to the surface water management system and environmental features of the project, such as the dimensions, spot elevations, contours, and representative cross-sections.

The information can be submitted on-line using eCompliance by visiting the District's Environmental Resource Permitting System in ePermitting located on the District's website at <http://WaterMatters.org/LogInERP>. If you do not have an account, you can sign up by clicking the "Register Now" button.

If this matter is not brought into compliance in a timely manner, the case may be referred to the District's Office of General Counsel for further action.

If you have questions, please contact me at (941) 377-3722, extension 6517.

Sincerely,

Steve Ellis
