I apologize I notice I made an error in citing the correct due dates in my last email. The current due date is June 6, 2021, which will now turn to July 6, 2021.

Respectfully,

Carley Trask, E.I.

Hi Jim,

Thanks for the update below. I understand it will take time for the HOA board members to consult with an engineering company and discuss solutions to resolve this compliance matter, so with that I will go ahead and grant a 30-day time extension from the June 9, 2021 deadline. The new due date will be July 9, 2021.

I appreciate if you can keep me updated on the progress of the corrective actions in case more time will be needed by the new due date.

Please feel free to let me now if you have any other questions or concerns in the meantime.

Respectfully,

Carley Trask, E.I.

[EXTERNAL SENDER] Use caution before opening.

Carley,

I met on site yesterday with Kevin Wiegand, with Argus Mgmt, and a couple of Laurel Lakes board members. After reviewing the situation, the board members have decided to contact an engineering company, as well as a dredge company, to discuss possible solutions to the situation.

After the board members meet with engineers, and decide how best to proceed, SWFWMD will be notified, and kept current with the progression of the project. It is not possible right now to give any exact dates or time table.

I hope this is sufficient for the time being. Either I or a representative of the HOA or Argus will keep you apprised of the progress.

Thanks for your cooperation.

Hi Jim,

I've attached the set of plans I used to determine the lots within the approximate area of the construction easement (landbridge).

Please see the areas outlined in red. The entire plans set was too large to include, but you can access it through our [Water Management Information System](#) portal. Here's the [link](#).

Thank you for letting me know the plan of action that will lead to resolving this issue. I'll be looking forward to your future correspondence.

Feel free to let me know if you may have any other questions or concerns.

Respectfully,

Dear Carley,

I am an environmental consultant with Creative Wetlands, Inc., and perform the littoral shelf monitoring at Laurel Lakes (Barton Farm). Kevin Weigand, with Argus Property Management, just sent me a copy of your letter dated May 07, 2021. The letter specifies that the easement is behind Lots 191-56. Could you be a little more specific, or provide a site plan showing the area in question?

Kevin and I are going to meet on site the first week of June to assess the situation. As it appears that this may result in the need of some site work, which would need to be approved by the HOA, additional time to respond to your letter is requested. If it is agreeable, Kevin or I will contact you after the site visit to discuss further details.

Thanks for your cooperation,

Jim Henslick
